The Servo motor rotates the container and drop the food on the time set by the user. The LCD is used for displaying the Date and Time. Complete working can be found in the Video given at the end. 3D-Printed Pet Feeder Model. We have designed this Arduino Pet Feeder container using the 3D-printer.

Automatic Pet Feeder using Arduino - Circuit Digest

Today we'll make a smart automatic pet feeder using Arduino Uno! The key components of the project include an RTC module to track time and manage feeding schedule, distance sensor to monitor food level, light sensor to distinguish day/night, and RFID to identify our pet.

Smart Automatic Pet Feeder with Arduino Uno

One such motor acts as the paper feed, spinning rollers that move the piece of paper as ink is being printed on it. This motor needs to be able to move the paper an exact distance to be able to print the next line of text or the next line of an image. There is another motor attached to a threaded rod that moves the print head back and forth.
