Biophilia Edward O Wilson

Wilson is a master storyteller, skillful at evoking exotic scenes.”—Washington Post Book World “A fine memoir by one of America’s foremost evolutionary biologists...erudite, elegant, and poetic. E. O. Wilson defines biophilia as ‘the innate tendency [in human beings] to focus on life and lifelike process. To an extent still undervalued in philosophy and religion, our existence depends on this propensity, our spirit is woven from it, hopes rise on its currents.’
