I was fortunate enough to fly in all three seats of the Boeing 727-200. Yes, there was an engineer on this aircraft and that side seat was a great place to learn about the airplane and crew resource management. There are some modifications and hush kits flying out there, but the aircraft fleet I flew generally had a max takeoff weight of 197,000 lbs, a range of 2200 miles (+/-), could carry 60,000 lbs of fuel depending on the optional fuel tanks, and could reach Mach .9 in a heartbeat (a ...
