Piezo injectors made by Bosch are available for pressure levels between 2.000 bar and 2.700 bar. They are used for the premium car segment and in light duty vehicles. The injectors have a modular construction and can be adapted to the customer's needs.

Piezo injector for common-rail systems

The common-rail system with piezo injectors by Bosch enables the flexible injection of fuel at pressures up to 2,700 bar. Even greater economy and precision The "Digital Rate Shaping" strategy (DRS) contributes to a very small delay between pre-injection and main injection.
