Processing Goods Reversal consists of reversing a goods receipt and acceptance. Reversals may correct errors in data entry or reflect a return of goods to vendor. Reversals created in WAWF do not automatically record in GFEBS via interface: they need manual recording in both WAWF and GFEBS.

Goods Receipt and Acceptance

The procedure for check receipts processing is outlined below: Record checks and cash. When the daily mail delivery arrives, record all received checks and cash on the mailroom check receipts list. For each check received, state on the form the name of the paying party, the check number and the amount paid. ...

Cash receipts procedure — AccountingTools

Identifying details of the receipt. Recording details of the receipt. The formal receiving process, or three-way match, is one in which you enter details of a receipt before you create the voucher. You create vouchers based on the receipt information. For example, if you enter a receipt for 50 pens, you must create a voucher for 50 pens.

Overview to Receipt Processing - Oracle Cloud

Film recorders are used in digital printing to generate master negatives for offset and other bulk printing processes. For preview, archiving, and small-volume reproduction, film recorders have been rendered obsolete by modern printers that produce photographic-quality hardcopies directly on plain paper.
