Department of Physics & Astronomy Lab Manual Undergraduate Labs Fitting Data Many times we want to fit a mathematical function to our data. This enables us to characterize, for example, how well our data agrees with a theoretical prediction. Do you have enough points to characterize your curve shape?

Graphical Presentation of Data - Astronomy

For qualitative information, text should be used if the relationships among data are simple and data are few, whereas a figure should be used if the relationships are complex. For quantitative information, a table should be used when the display of exact values is important, whereas a figure (eg, a line graph) should be used to demonstrate patterns or trends.

Visual Presentation of Data - AMA Manual of Style

PRESENTATION OF DATA 1.1 INTRODUCTION Once data has been collected, it has to be classified and organised in such a way that it becomes easily readable and interpretable, that is, converted to information. Before the calculation of descriptive statistics, it is sometimes a good idea to present data as tables, charts, diagrams or graphs.
