when I was exposed daily to planning and operational problems in the public transit field. The third motivation came in 1981. I was at Massachusetts Institute of Technology (MIT) in Boston where, together with Professor Nigel Wilson, I was to give a new summer session course on Transit Operations Planning.

Public Transit Planning and Operation

From the supply side, most public transit systems operate service that has some common characteristics. The most salient of these are the vehicle cycle and the notion of capacity. Later, we address some operating characteristics of specific modes, notably separating rail modes from fixed-route bus service.
