Reconstructing Fossil Bones. ... For more information on this activity, go to The Great Fossil Find at ENSI. Imagine the year is 1826 and you are the German paleontologist, August Goldfuss. ... Scaphognathus crassirostris was a pterosaur that lived in Germany during the Late Jurassic. It had a wingspan of about one meter.

Reconstructing Fossil Bones | EpicOfEvolution

Pterosaur anatomy is reconstructed from fossils such as these: a beautifully articulated but flat Pterodactylus from Solnhofen (top), and a three-dimensionally preserved but partly disarticulated Anhanguera pelvis from the Santana formation, Brazil (bottom). Restoring the anatomy of any pterosaur starts with the fossil remains.

Pterosaur.net :: Restoring Pterosaurs

At least, that is the chain of events suggested by a fossil described earlier this week in Scientific Reports: a preserved cephalopod with a pterosaur tooth embedded inside of it.

Fossilized Tooth Captures a Pterosaur's Failed Squid Meal ...

While very rare in the fossil record, pterosaur fossils have been found in many different locations around the world. Some of the more well known localities are below Solnhofen Limestone In Germany - As many as 29 different species of Pterosaurs ranging the the size of a sparrow to four feet long have been discovered in the Late Jurassic ...
