I took the bait, purchased and downloaded REX Skyforce 3D a couple days ago. After installing it, I then got to look at the manual and it's recommendations for installing. I learned that they wanted a couple things done during installation that unfortunately I didn't do. Like turning off notifications, turning off my anti-virus (which I always dislike doing) and running as administrator.

REX SKY FORCE 3D is more a piece of art than a scientific wonder. It proves the fact that REX are artists, who make the most beautiful and immersive textures for FSX-based flight simulators. Yes, the software was released with some 'cheap' bugs, but artists are sometimes a little bit scatterbrained, right?
